

E-world in Essen: Neways Electronics demonstrates IoT in interactive environment

Son, 04.02.2019: The EMS Lifecycle partner Neways Electronics International will exhibit from the 5th until the 7th of February at the E-world energy & water, the leading trade fair for the energy industry. Neways Electronics presents its competences in the development and production of electronics with a special focus on the “Internet of Things” (IoT). The booth is designed as a smart office with different kinds of sensors, like a soil sensor, movement sensor or a distance sensor, which the visitor can test.

“The challenge is to connect different IoT platforms so that they can work together”, explains Roel Vossen, Sr. Project Manager & System Architect at Neways Technologies B.V.. “Since 2016 Neways Electronics participates in the so called INTER-IoT project, which is concentrating on the interoperability among different IoT-platforms. Within this EU project we develop, implement and test in practice an open source framework with associated methodology and tools to enable the interoperability of heterogeneous IoT platforms”, Roel Vossen continues.

Last year a pilot has been rolled out for example in the Port of Valencia, where this Inter-IoT approach is implemented. The result is that all stakeholders (e.g. customers, port authorities, shipping companies, haulers, etc.), can use their existing different software tools and the Inter-IoT makes them working together.

At the E-world energy & water the booth will be staffed by Neways Electronics together with some INTER-IoT partners, for example the University of Warsaw, the British company Rinicom Ltd. and the Technical University of Valencia. Visitors can get to know the INTER-IoT project in detail as well as the benefits of the Internet of Things.

About Neways Electronics International N.V.: Neways Electronics International N.V. (Neways) is an international company active in the EMS (Electronic Manufacturing Services) market. Neways offers its clients custom-made solutions for the complete product life cycle (from product development to after-sales service) of both electronic components and complete (box-built) electronic control systems. Neways operates in a niche of the EMS market and focuses primarily on small to medium-sized specialist series, in which quality, flexibility and time-to-market play a crucial role. Neways products are used in sectors such as the semiconductor, medical, automotive, general industry and defence industries. Neways has operating companies in the Netherlands, Germany, the Czech Republic, Slovakia and China, with a total of 2,792 employees at year-end 2017. Neways recorded net turnover of € 438.7 million in 2017. Neways shares are listed on the Euronext Amsterdam stock exchange (symbol: NEWAY). www.newayselectronics.com
